

Cortland County Chase Field (N03)

Airfest 2011 WINGS Safety Seminars

July 16, 2011 – 9:00 AM

Preventative Maintenance, Aircraft Airworthiness, Good Pilot Habits

Presented by Bill Abbott, Jim Ambrose, and David St. George

The Federal Aviation Regulations require that an aircraft is "Airworthy" before a pilot can legally fly it! But do you know the definition of the term airworthy? How can a pilot be assured the aircraft meets this requirement? Also, Do you know the "good habits" shared by safe pilots? Enjoy an interactive workshop focusing on the knowledge, attitude and skills that ensure safe flying operations. See the "Additional Seminar Information" for all the details. Don't miss it!
Select Number: EA2339403

Fly in or drive in and enjoy the best general aviation community event in heart of central New York! Earn WINGS credits at the FAA WINGS seminars held right on the field. Vintage aircraft static displays, airplane, helicopter and glider rides, R/C aircraft show, Crossroad the Clown show, kids bouncy house, food: fish fry, BBQ, gourmet coffee, baked goods, music. Check the website often for updates: <http://www.ccaviators.org/> (Rain date July 17).

These WINGS seminars are part of the Cortland County Airport AIRFEST event.

Aircraft Airworthiness presented by Bill Abbott of the FAA Rochester, NY Flight Standards District Office.

The Federal Aviation Regulations require that an aircraft is "Airworthy" before a pilot can legally fly it! But do you know the definition of the term airworthy? How can a pilot be assured the aircraft meets this requirement? What inspections are required? How can you determine that they have been accomplished? What about ADs, STCs, TCs, 337 Forms? Attend this informative meeting and find out!

Determining Airworthiness is a very important responsibility for all pilots. However, many don't know what the requirements are; further still don't know what to look for in making these determinations. At this interesting and informative safety briefing, featured speaker Bill Abbott, a FAA Inspector will demystify the process for determining aircraft airworthiness.

He'll discuss the definition of airworthy, required inspections, pilot operator responsibilities, the airworthiness certificate, inoperative equipment, Supplemental Type Certificates (STCs), Major Alterations and 337 Forms, documentation, Airworthiness Directives (ADs), Preventative Maintenance, Special Flight Permits, Records and much, much more.

Good Pilot Habits presented by Jim Ambrose, FAA Safety Team Representative.

Safe pilots share a number of flying "habits". How a person "thinks" about their responsibilities as a pilot is essential to safe and enjoyable flying. This interactive Workshop will highlight the knowledge, attitude and skills necessary to be a consistently safe and confident pilot. The attendee will learn from the ideas of others, and the presentation will help form new or improved habits for safe flying. Don't miss it!
